Diamond Jubilee Celebration

The General Committee for the Diamond Jubilee Celebrations on 1st July report a very fine enthusiasm throughout the district, and a well-organized celebration with guests of fun is now assured. Meetings of committees are being held almost daily, but the climax was reached on Saturday night, when some sixty representatives from town and country gathered to discuss future.

With a celebration of such proportions in view, the citizens of Delia must "step out." The committees cannot undertake individual decorations, and through the business section and the town will be organized, and decorations arranged, the private citizens should begin now to plan for the celebration of their individual residences. Every house in town should fly its flag and show some other decoration, and even at the clubhouses, decorations should be decorated to help the gaiety of the day.

The government has supplied a book of suggestions for floats. Any one interested should inquire from F. A. Low, or any member of the float committee.

The terminal elevator after purchased by the Alberta Wheat Pool, in Vancouver Harbor is one of the best in the world for an elevator to be found there.

Times show for the June brides to begin selecting the proper gown. Being hot at times isn't half so painful as going through the affair to try anything.

Board of Trade Meeting

The monthly meeting of the Board of Trade was held on Monday of this week. Reports were received from the various committees and the Board discussed.

The members felt that Delia does not receive the publicity which it records as a farming district deserves, and the Committee (E. M. Bigelow, Chairman) were instructed to draw some new signs for the convenience of the travelling public, and to generally do all possible to see that road programmes give reasonable attention to the roads leading to the village.

The meeting voted unanimously in favour of the Board of Trade endorsing the petition to the Dominion General covering the purchase of the Bank of Montreal building for a new Post Office, it being the general opinion that this building would be most satisfactory for the purpose.

The meeting discussed the advisability of holding a "Sales Day" later in the season. On such a day all merchants would put on sales, and the Board of Trade Office, by sending moving pictures and a dance would endeavor to foster a better acquaintance of all members of the community. The committee of Mr. Cobb and Mr. D. H. Campbell, the question was tabled for discussion at next meeting.

The Executive Committee were authorized to change the date of the celebration if they felt it advisable. Great results are expected making it a "Board of Trade month" with an additional, if a speaker could be obtained.

Cemetery Improvement

On Monday and Tuesday evenings the City Council were again actively engaged in beautifying the cemetery. The committee had obtained the help of a large number of volunteers and on Monday put down some 500 plants. On Tuesday evening all these plants were watered and cared for and the stones, which have recently been placed in the lots at the corner, were in place. The committee is due to the cemetery and the volunteer helpers.

If this evening would only gather the flowers and plants which will adorn the graves on this plot, the whole appearance of the cemetery would be improved, which are unable to give their own hands. The committee will also be in the cemetery on the same day, and the amount they would be willing to spend.

Death of Mrs. James Luther

It is with much regret that we record the death of Mrs. James Luther in the Home Hospital on Tuesday morning, June 7. The deceased was 70 years of age. Her marriage was Miss Beale Ramsay, came to this country from Scotland about eight years ago, and her unselfish hospitality and gentleness won the respect of all who knew her. In 1921 she married Jim Luther, who was a well-known and successful business man. Her husband also leaves two little girls, the baby being only two weeks old.

The funeral service was held on Wednesday afternoon in the United Church, the Rev. J. G. Green officiating. The service was a beautiful one. The choir sang the hymn, "Rock of Ages." The pall-bearers were Art, Dean, Connelly, McGilly, James, Jim, Joe, James, Leslie Dunfield and Erwin Dunfield. There were many beautiful floral tributes.

Fire North of Delia

A disastrous fire occurred at the home of Mrs. Annie Martin on Wednesday morning, June 8. The house was completely demolished. Mrs. Martin had come to Craigmile, Miss Delia, to see her son Charlie, who was working on the road nearby, noticed smoke and flames coming out of the back porch windows. He hurried to the house and was able to rescue the piano and several other articles of furniture that were on the ground floor.

Henry Blaney passed shortly after and eluded from A. L. Gordon's to Delia for help. Several minutes should be kept by the time they reached the scene, the fire had taken too great a hold, and they were powerless to save it.

In this the second time Mrs. Martin's home has been destroyed by fire, the first time being in 1915. Several minutes should be kept by the time they reached the scene, the fire had taken too great a hold, and they were powerless to save it. The fire broke out in the kitchen, and the flames spread rapidly to the rest of the house. The fire was caused by a gas leak, and the fire was caused by a gas leak. The fire was caused by a gas leak, and the fire was caused by a gas leak.

Pool News Letter

Considerable progress has been made in the 1927 elevator season in the Alberta Wheat Pool. As a result of negotiations with elevator companies, very little wheat has been bought this year. In addition thirty-seven have been contracted for where there is no so much elevator where it is apparent the present owners have decided to sell the balance of this property to the Pool.

With regard to the balance of the program, the elevator will be in progress. It is the constant expectation of the directors that the full program will be carried out in sufficient time to have all the homes available for the purpose of grain at the beginning of the next shipping season.

The financing of this purchase and the new construction is being conducted entirely out of funds on hand as the result of the accumulation of the Elevator Board's deduction of \$2. a bushel from the proceeds of the sale of members' wheat in the last shipping season, plus accumulation of deductions for Commercial Elevators covering the past three crop years which also may be used for acquiring of elevators, if required.

No promises of elevators on condition of a big sign-up of elevator stock are being made. Elevators are being built or acquired at points where deliveries have been heavy during the past three years. The elevator companies intend to elevate funds are obviously from those points where the most wheat has been marketed.

SIGN UP DRIVE

The machinery for the campaign is put over the sign-up of the Second Series of Wheat Pool contracts has been put in motion. The drive will start on Monday, June 20th, and it is planned to conduct a house-to-house canvass of the province.

The success with which our officers have marketed wheat has been during its brief history has won widespread admiration for the Pool organization. The possibility for the future is vast. The great majority of Alberta producers and shippers are in the Wheat Pool method of marketing.

The main reason for the formation of the Wheat Pool was to secure a better price for the producer. The Wheat Pool was formed to secure a better price for the producer. General Conditions in Canada

The meeting of wheat lands in the Canadian West has been delayed from three to four weeks, owing to generally inclement weather throughout the territory, with the result that the acreage devoted to wheat this season will be somewhat smaller than last year. According to the Manitoba Free Press, the reduction in wheat acreage will amount to 250,000 to 300,000 acres in Saskatchewan and 10% in Alberta. In Alberta, the farmers have enjoyed better weather than last year experienced in other parts of the Prairie Province. Since moisture conditions are satisfactory, germination and growth should be rapid with the advent of warm, dry weather.

The early opening of lake and river navigation stimulated all lines of trade, and the handling of merchandise and L.C.L. freight are well in advance of those of last year, giving direct indication of a better feeling in the wholesale and retail trade.

The fact that the principal manufacturing establishments throughout Canada are operating at or near capacity and have orders backlog that will keep them active for some months to come explains the employment figures for May, which were the largest yet recorded for this month since these figures were first published in 1920. The iron and steel industry, for instance, is more active than at any time in the past three years, with big iron production for the first four months of the year compared to 100,000 tons and fifty-five thousand tons, an increase of 15% in excess of last year, and with steel tonnage three hundred and thirty thousand tons, an increase of 27%. The newspaper industry, although operating at only 87% of capacity as compared with the same period of 1926, produced a much larger output. The total output of the newspaper industry in 1926 was 12.6% in excess of that for January, 1926.

With agricultural prices and wages at relatively high levels, the buying power of the general public is likely to remain satisfactory. Manufacturers and wholesale and retail trade will gain by this situation so long as it is possible to reduce costs to a rate equivalent to the fall in prices.

The price situation in Canada is very similar to that in the United States. The Canadian Bankers' Reserve Bulletin for April, 1926, the wholesale price index of the United States Labour Bureau fell from 155 in February, 1926, to 145 in February, 1927. Since both countries are on a gold basis and since each country has a substantial production of gold, the price levels of both countries are bound to rise or fall together. For this reason, Canadians are instinctively concerned with the gold market as being used in the United States to maintain stability during the present period of falling prices.

The local committee has got its plans well under way for the Diamond Jubilee of Confederation Celebration which is to be held on July 1st, and it is expected that it will be a memorable occasion just as the Dominion Centennial was. Every one else devoted to it should be.

Professor A. E. Ottewill, of the University Extension Department, gave an illustrated lecture in the Union Church on 2nd inst. to a very large audience.

Mrs. N. V. Taylor, who was severely injured in the railway crossing accident two miles east of town on 2nd inst. last week, who has been in the Home Hospital since that time, came home to the farm with her baby daughter on Friday.

The local ladies of Adair Lodge of the Order of the Eastern Star held a very successful tea and sale of home cooking last Saturday afternoon.

The local schoolboys had a busy afternoon and evening of basketball last Saturday playing two games. In the afternoon they defeated a team made up of boys from Burdette, Kelowna and Victoria schools and in the evening they defeated the boys from Burnaby. Nicholas Phillips did the strong man act in pitching both games with the exception of two line outs.

Being your brother's keeper doesn't mean keep his shirt. Exceeding devotion, especially exercising your direction. What really makes rednecks is worry over what they can't eat.
